Chain link fence can magically blend into the surrounding landscape or create a more stately image for your property and home using today's new color and styles.

And today's chain link fence materials meet new and quality standards to assure lasting beauty and your continued satisfaction for many years to come.

• More Peace of Mind.

Today's quality chain link fence gives you more peace of mind by allowing parents to keep an eye on children at play and pets safe at home.

Chain link is the number one selling fence system in the world, It gives homeowners the protection and security they need for their property, pets and children

CHAIN LINK FENCE MANUFACTURERS INSTITUTE

• More Variety.

New product innovations give you a variety of chain link colors to choose from including black, brown and green. In addition, there are new styles to consider and mix and match options can save you money.

Today's chain link offers you the color , styles and quality that fit into any neighborhood.

• New Styles

New framework and styles of chain link fence can improve the appearance of your property and home. Choose a more distinguished square post design to create an elegant image or use chain link fabric on a wood frame around your house. Create a unique new chain link fence design today by using different colors and frames.

• New Color

Today's chain link fence is available in green, brown and black that gently blends into the surrounding environment or provides colorful security that accents your home.

• New Options

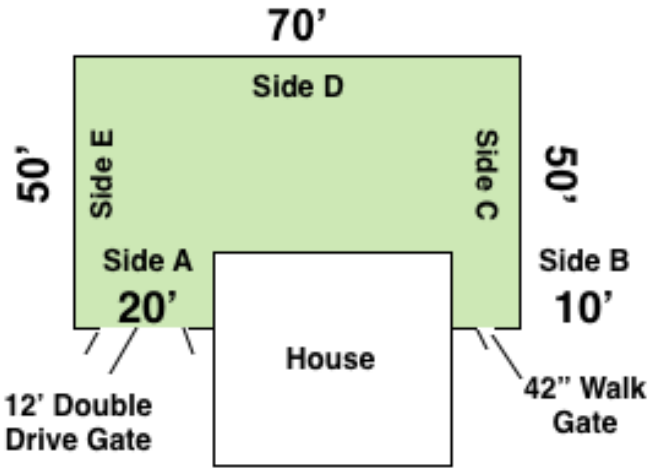

Composite fencing is a cost effective way to get the most for your money while maximizing your home's curb appeal. This design mixes the type of fence used in front, side and back yards to reduce total fencing cost while maintaining community aesthetic standards.

By using an alternative fence on the ares of the yard seen from the street and using traditional varieties of chain link in the back yard, you can stretch your buying power.

• Cost Effective Design Options

Mixing and matching different types of fence can save you money. This is a typical composite fence installation that uses cost-effective color-coated fence around the back yard and *more expensive fencing options (such as privacy wood and ornamental iron) in the front facing the street.

Please note: Prices for all products will vary depending on grade changes, soil conditions and regional differences. Consult your local chain link dealer for a more specific quote.

• Move Tradition

Today's metallic and color-coated chain link fence products are as strong as ever and fit into any neighborhood. Both products offer a range of benefits that provide value to you and your property.

Metallic Chain Link Fence

- *lowest cost*
- *high visibility to children and pets*
- *low maintenance*

Color-Coated Chain Link Fence

- *enhances the overall landscaping of the property*
- *blends into the environment*
- *available in a variety of colors*

• More Value

Chain link fence is by far the most economical, permanent, residential fence system available today. With many colors and styles, chain link offers appealing variety and cost-effective solutions for protecting children, pets and property.

Expect More From Chain Link.

The average consumer expects a new chain link fence to last over 20 years and one built with quality materials can last even longer.

To get the enjoyment and durability you expect from your new fence, invest in quality materials. A chain link fence built with quality materials can last longer than 20 years expected by most.

While you might save money on lower grades of chain link fence materials, the savings will be at the expense of the quality and durability. The initial additional cost of a chain link fence constructed using stronger heavier/thicker wall framework and heavier gauge, smaller mesh fabric adds more value, more strength and longevity than one constructed using low grade materials. The stronger materials will make your fence look better for many more years.

Versatility

Chain link fence is even more versatile when using vinyl or wood slats in a new fence. Home-owners can add color and beauty to any setting while screening unsightly surroundings, shaping a backdrop to landscaping, or creating more privacy for a pool or a yard.

What's the Next Step?

Now that you have familiarized yourself with chain link fence, it is a good idea to look for residential fence contractors having at least 5 years experience, a place of business to view samples and preferably a member of the American Fence Association (AFA).

CLFMI polled residential fence consumers to determine their expectations for fence strength and life span, and the results were converted into these minimum recommended products.

	Fence Hight	Wall Line Post	Wall Terminal Post	Wall Top Rail
Minimum Framework	**4ft or 5ft**	**1 5/8" OD 0.055"**	**1 7/8" OD 0.055"**	**1 3/8" OD 0.055"**
	6 ft Residential Fence	**1 7/8" OD 0.065"**	**2 3/8" OD 0.065**	**1 3/8" OD 0.065"**
Minimum Chain Link Fabric	**The minimum chain link fabric shall have maximum mesh opening of 2 1/8" woven using a minimum 11 ½ gauge wire.**			

For additional fabric information visit the CLFMI Product Manual for a listing of all the available mesh sizes and gauges.

The posts and rails are available in thicker/heavier walls up to 0.072" and greater for those climates requiring additional strength for snow load or applications requiring additional strength.

Require all gates and gate posts comply with the American Society of Testing and Materials International (ASTM) standard F654 "Specification for Residential Chain Link Fence Gates".

Require that your fence and gates be installed in compliance with ASTM standard F567 "Practice for Installing Chain Link Gates"

Check local codes for fence height and mesh size when installing a fence for a pool or follow the ASTM standard F1908 "Guide for Fences for Outdoor Residential Swimming Pools", Hot Tubs and Spas.
